Health Research and Development Information Network
Network-of-Networks

Introduction

What is HERDIN?

- A specialized network of documentation and information centers engaged in health research and development activities.
- Herdin hosts electronic collection or database of bibliographic entries of published and unpublished health researches in the Philippines in cooperation with other member-institutions.
- First online health search service in the country

Our Vision

- Quality health information, on time and online, for better health, better quality of life.

Our Mission

- To build the capacities of health research institutions to participate in building and in sharing information resources as part of managing knowledge for better health.

Introduction

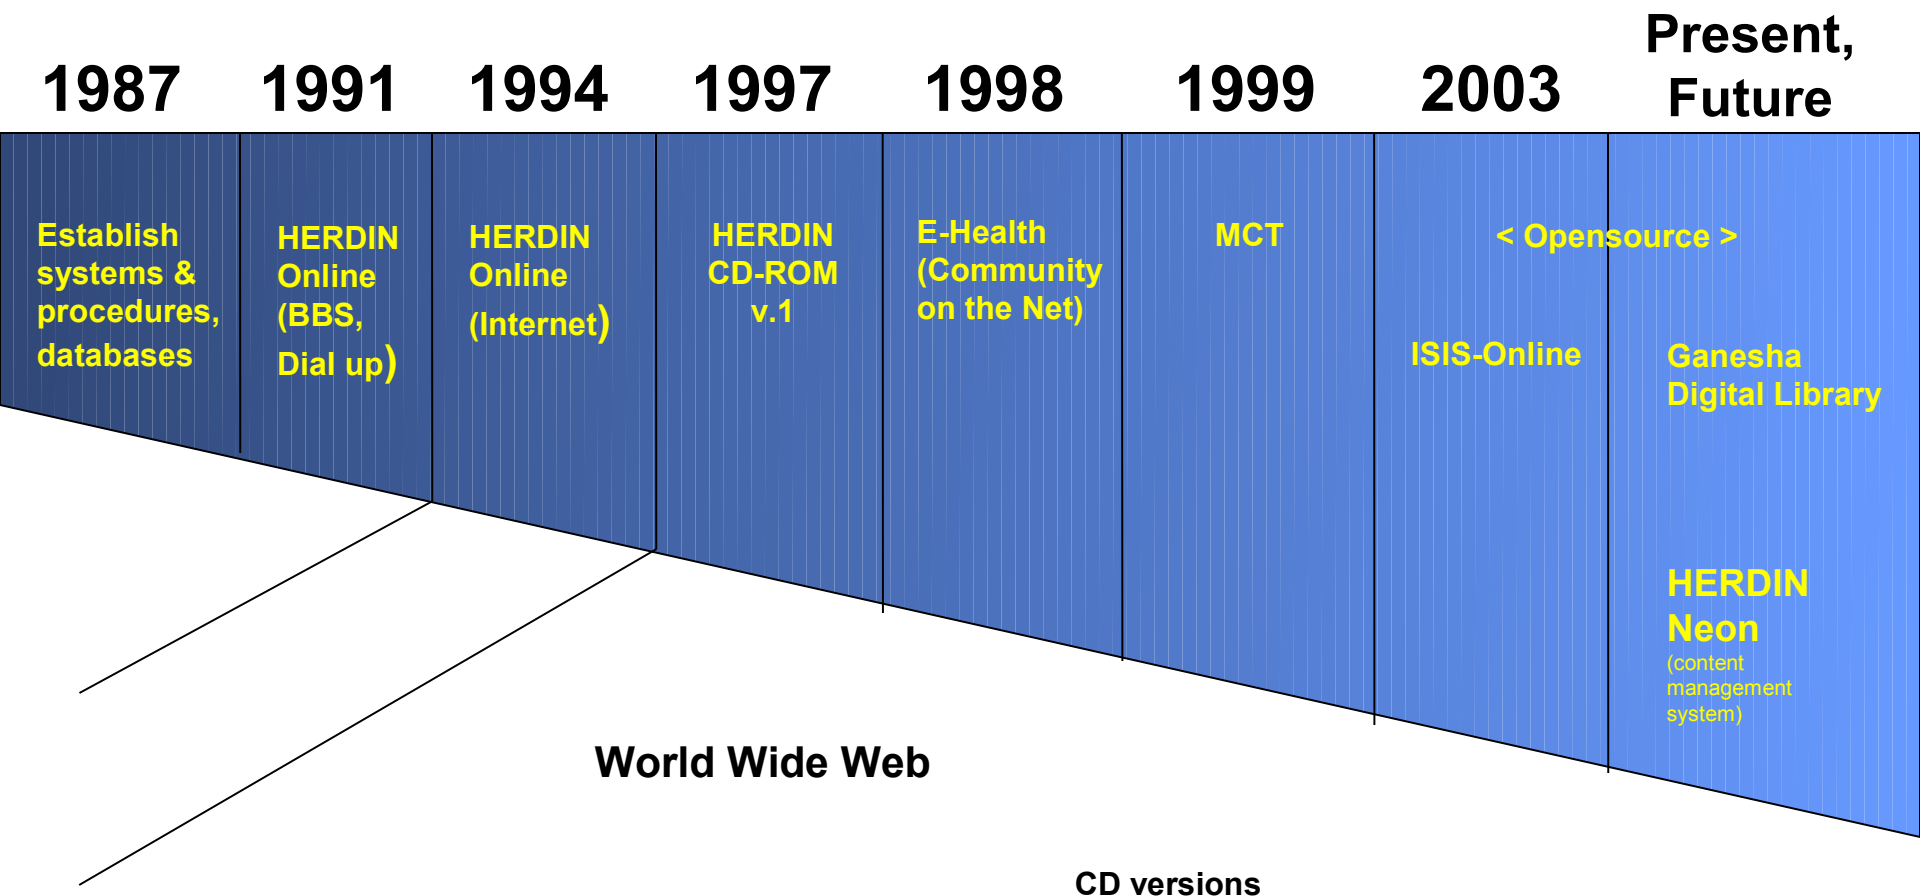

How did HERDIN start?

- It started as a project of the Philippine Council for Health Research and Development (PCHRD) supported by International Development Research Centre (IDRC) of Canada, United Nations Educational, Scientific and Cultural Organization (UNESCO), and the British Council with Department of Health (DOH) and University of the Philippines (UP) Manila as Major Cooperator

Major Cooperators

Starting with HERDIN and moving forward

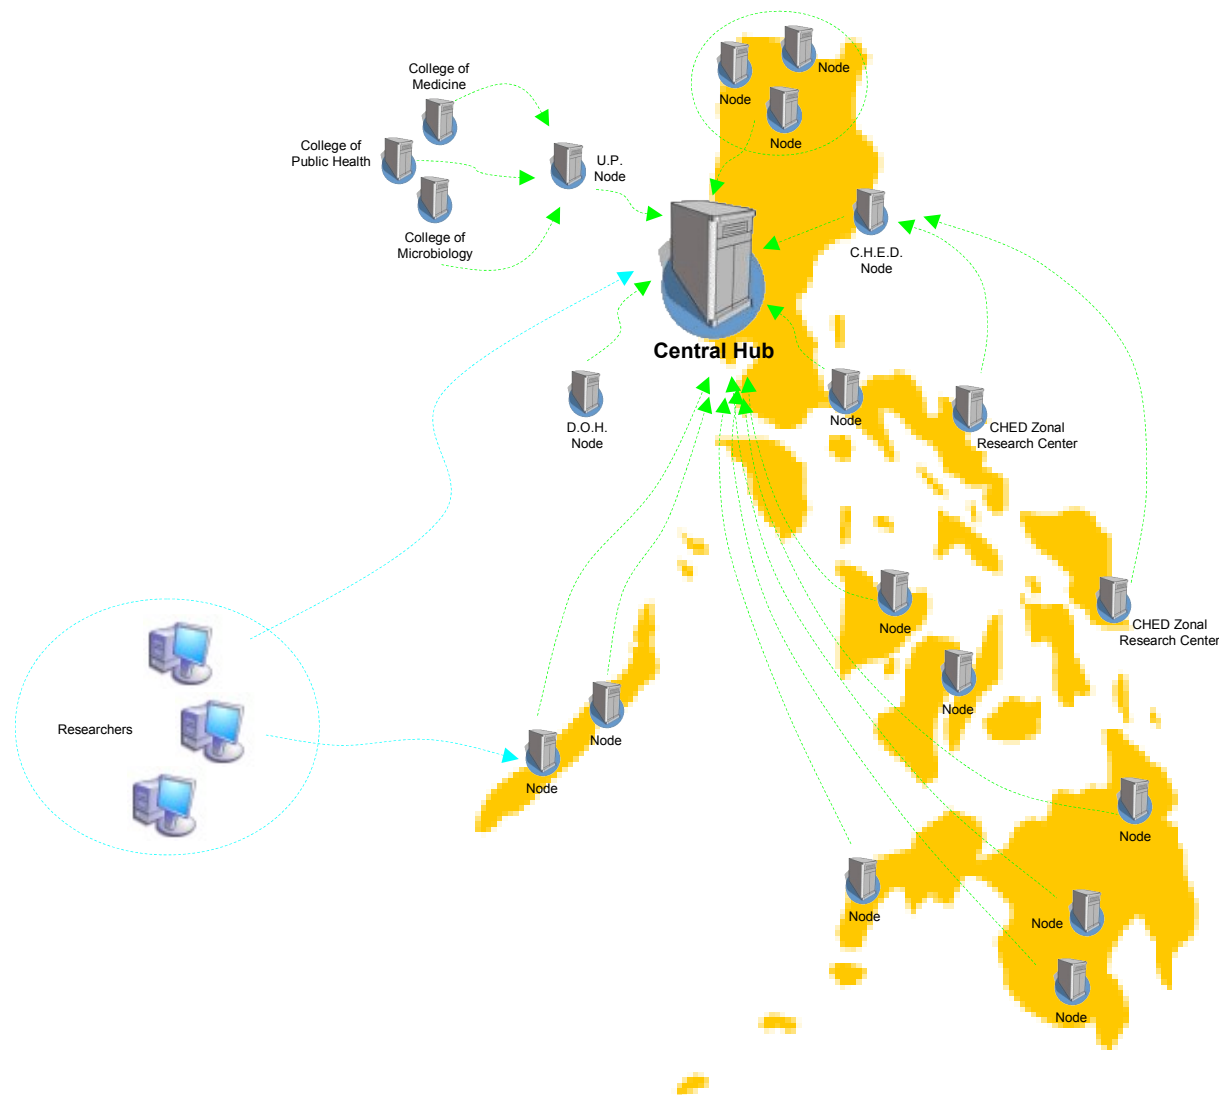

HERDIN NeoN

What is HERDIN NeoN?

- Herdin Networks of Networks (NeoN) is a system and database that enables online exchange of information and allows distributed knowledge repository network.
- The new NeoN uses new technologies to further improve functionalities and over-all performance such as searching, data entry, interface, skins, easiness of customizations, automated link and data collection from nodes, and best of all, relationship linkage of researches, projects, authors, experts, and institutions.

HERDIN NeoN How does it work?

HERDIN NeoN

What sort of information can I get from the HERDIN NeoN?

- HERDIN NeoN covers health researches in the Philippines, and/or health researches authored by Filipinos.
- HERDIN NeoN can include whatever health researches are available in the member institutions' collection. It can be theses, dissertations, research reports, journal articles, projects, laws, proceedings, books, except news clippings.

Home Page

The screenshot displays the HERDIN Home Page with several key features highlighted by callouts:

- Search:** A search bar with a "Go" button and links for "Researches | Experts | Institutions".
- Latest Articles:** A list of recent publications, including "Filipino American women's perceptions and experiences with breast cancer screening" and "A giant malignant gastrointestinal stromal tumor of the stomach: A case report".
- Main Menu:** A vertical navigation menu on the right side containing "Home", "HERDIN 2005 - Present (e-ON)", "HERDIN 1996-2004 (Isis Online)", and "FAQ".
- Database Date Scope:** A callout pointing to the "HERDIN 1996-2004 (Isis Online)" menu item.
- Account Login/Registration:** A callout pointing to the login form, which includes fields for "Username" and "Password", a "Remember me" checkbox, a "Login" button, and a "Lost Password? No account yet? Register" link.

Sample of New HERDIN system and content

Registered user interface

The screenshot shows the HERDIN system interface. The header includes the 'herdin' logo and 'Health Research and Development Information Network'. Below the header, there are navigation links for 'Researches', 'Experts', and 'Institutions'. A search bar is present with a 'Go' button. The main content area is titled 'Research List' and contains a table of research entries. The table has columns for '#', 'Title', 'Published', 'Utilization', and 'Date'. The 'Utilization' column shows 'Knowledge-based' for all entries. The 'Date' column shows '18/01/07' for all entries. The 'Published' column shows a red 'X' for all entries. The 'Title' column contains various research titles, some with checkboxes. The interface also includes a 'MAIN MENU' on the right side with links like 'Home', 'HERDIN 2005', 'HERDIN 1906-2004', and 'FAQ'. A 'USER MENU' is also visible with a 'Logout' button. Annotations with orange circles and lines point to specific features: 'Database selection' points to the navigation links; 'Research List' points to the table; 'Records options' points to the 'New', 'Edit', 'View', 'Publish', 'Unpublish', and 'Trash' icons; and 'Account Information/Quick Logout' points to the 'Logout' button.

500 ^a Objectives: 1. To present a case report of a patient with a rare cause of malabsorption. 2. To review the different causes of malabsorption and to discuss the differential diagnoses in this patient. 3. To educate our internists and gastroenterologists on this rare disease entity

Setting: St. Luke's Medical Center, Quezon City

Case Summary: A 75 year-old Filipino patient of Chinese descent was evaluated at our institution for chronic diarrhea, malnutrition, and malabsorption. The patient was initially seen in Davao City where an initial work-up did not yield any diagnosis. He was then evaluated at St. Luke's Medical Center where further investigation did not establish the underlying cause. He was subsequently admitted at the Mayo Clinic in Rochester, MN, U.S.A. Extensive investigation, including immunohistologic phenotyping and polymerase chain reaction (PCR) of the small intestinal intraepithelial lymphocytes, was done. These studies eventually established the underlying etiology of the patient's malabsorption. The patient eventually expired due to complications of the underlying disease. (Author)

Predictors for passing the Philippine Medical Licensure examination among medical graduates of MCU-FDTMF 

Fulltext:  from PCHRD

1 Items in My Cart | Added to Cart

Research Details

Herdin Record #: PCHRD011807070157

English Title: Predictors for passing the Philippine Medical Licensure examination among medical graduates of MCU-FDTMF

Language: English

Objectives

This study is primarily undertaken to contribute to the possible explanation of the declining trend of this institution's performance in the medical licensure test. It will focus on the association of the (NMAT) score, preparatory medicine course, point average, medical school grade, and ranking in medical school upon graduation, with the performance in the PMLE; also, it aims to establish which of the above mentioned variables, whether single or in combination will strongly predict the PMLE results.

HERDIN NeoN

Is this service offered for free?

- Yes. There is NO CHARGE whatsoever for joining and for using the HERDIN NeoN search engine.
- Charge for full-text will depend on the publisher or providing node.

Can I get a copy of the Full-text? How?

- If available, Yes. There are 4 ways:
 1. If the full-text is on-line and offered for free. Simply download it.
 2. If the full-text is on-line and not offered for free. You'll need to register and abide by the providing node's terms for payment. Then download it.
 3. Order online from us the full-text and we'll deliver them thru courier or email for a fee.
 4. You will have to contact the librarian of the institution where the full-text can be physically located and inquire personally. Each institution has its own rules and procedures regarding this.

HERDIN NeoN

Who are the target users of the HERDIN NeoN?

- The HERDIN NeoN is primarily for the serious health researchers. Other target users are students, medical professionals, health industry, health research community, and the general public.

Can non-members use the HERDIN NeoN?

- Yes. HERDIN NeoN is open to the public. Users do not need to be a member to use the search engine.

HERDIN NeoN

Who can join the HERDIN NeoN?

HERDIN NeoN is open for membership to institutions that:

- share the vision and mission of HERDIN NeoN and commits institutional resources to implement the same
- share their health research collections
- sustain institutional information building & updating activities

HERDIN NeoN

Why do we have to join then?

What are the benefits of joining the HERDIN NeoN?

- enhance your institutional profile by sharing your information to your publics
- develop your capability in organizing, processing, digitizing, and disseminating research information
- access a free and open-source system which will enable you to organize, share, and easily maintain your collections
- opportunity for income generation thru digitized full-text.
- participate in building the national health research database

HERDIN NeoN

Resource Requirements:

- Subject specialist, researchers and/or information specialists with expertise and experience in health information content development work.
- Computer with broadband Internet connection
- IT specialist, preferably with knowledge in open-source systems

HERDIN NeoN

Digitized Full-text, What's the benefit?

- Towards the trend and international standards.
- You are able to offer online version which able to provide the public greater access to full-text articles.
- More flexibility and portability.
- Opportunity for income generation thru account registration.

HERDIN NeoN

How can we join?

There are three steps to follow :

1. Download the standard MOA from HERDIN website and study it carefully. If you have questions or want to modify portions of the MOA, contact PCHRD for discussion.
1. Sign the MOA and forward 2 copies to PCHRD.
1. We will send back a fully-signed copy.

HERDIN NeoN

Now that you are a member-institution.

1. We will schedule an installation and training for you.
1. After the installation and training, You can now encode or input your collection to your new HERDIN NeoN system.
1. HERDIN NeoN system will automatically send your collection to the Central Hub on a specified time.

HERDIN NeoN

Future Plans

1. Have an annual members' meeting or forum where issues, new ideas and improvements will be discussed.
1. Node of the year award.
1. Continuous Implementation of new technologies.

Thank you very much.
