### Research Grants

#### National Unified Health Research Agenda (NUHRA)

- The PNHRS National Unified Health Research Agenda (NUHRA) provides directions and specific areas and topics where research investments should be made to address pressing health problems/needs of the country, thereby ensuring health and productivity of the Filipinos, and contribute to national development. The NUHRA, a product of regional, zonal and national level consultations with various stakeholders, is in line with global and national initiatives influencing the health sector.
- The NUHRA 2006-2010 was updated into NUHRA 2008-2010 to account for recent developments, new directions and thrusts of concerned agencies, and other health related initiatives. The updating provided the opportunity to refocus research priorities to better address existing health problems, emerging gaps, and new challenges.
- The PNHRS will provide funding assistance for research
