

Directions in Health Research

Department of Health, Philippines

Asec. Madeleine De Rosas-Valera

November 21, 2012

Pan Pacific Hotel

BACKGROUND

KP reforms need to generate information for evidence based policies, plans and programs

Limitations in the current system processes to meet the rapid increase in knowledge and technology innovations and demand

Inadequate staff complement and capacity

Low expenditures for research

OBJECTIVES

Generate more health researches to provide evidence for policy

To establish productive partnerships among government and other research institutions

To increase capacity for research, knowledge management, policy development in the health sector

**Health Systems Research
